

APPENDIX.

REPORT of the PRODUCTIONS, COMMERCE, and MANUFACTURES,
of the SOUTHERN DISTRICTS in *MALLEAM* (*Malayaam*) framed by
the Resident at *Calicut*, agreeably to the Instructions of the Commissioners ap-
pointed to inspect the Countries ceded by *Tippoo Sultan* on the *Malabar Coast* ;
and comprized under the following Heads, *viz.*

Ist, ACCOUNT of the several ARTICLES of COMMERCE produced or manufactured,
and which are also consumed in the Country.

In calculating the probable profit on the following List of Articles, a deduction must be made for Inland Duties, Customs, and other Charges, which are very considerable, but which cannot be accurately ascertained; for this reason, the difference between their respective local value, and when ready to be sold at, or exported from, the sea-coast, has been put down as the profit arising on the trade. Many of the Articles inserted in this List, are of too trifling a nature to yield any advantages worth mentioning in a commercial point of view.

Teak wood is at present very scarce at *Calicut* and the sea-ports, owing to the elephants which were employed in this trade being taken away by the *Azob* (*Tippoo*) for the use of his army. Before the *Teak* Timber can be brought from the forests, the process is very tedious. It is, in the first instance, necessary to cut off all the branches from the trees intended to be cut down; to cut the tree nearly two-thirds through, and to make long incisions in the bark; in which state it must remain one year to dry, during which time the bark falls off of itself; after which it is cut down, pushed into the rivers contiguous, during the rains, by elephants, and floated down them to different places. The *Teak* wood, when green, is very heavy; and sinks in water.

The *Poon* spars are got in nearly the same manner, but the *Jack* tree can be cut down at any time.

An ABSTRACT of the GOODS IMPORTED and EXPORTED by SEA, for the different Years, taken from the Custom-House Account of *Tellichery* Circle.
